

AQUATHERM BLUE

Lightweight, durable, long-lasting Aquatherm PP-RCT Blue Pipe is our flagship product. It is available in sizes up to 24-in. to handle any size commercial HVAC project, including multi-unit residential, office, commercial, industrial and government buildings, as well as data centers, schools and universities.

- Aquatherm piping systems can handle any commercial or industrial HVAC project, both new construction and retrofit.
- Aquatherm's heat fusion connections are fast, which means a lower total installed cost and higher profits for you. In addition, a properly performed heat fusion creates a solid connection that will not leak.
- Aquatherm pipe is lightweight and durable, with an expected life span of 50+ years.
- Aquatherm pipe is hydrophobic and will never scale or corrode.
- Aquatherm pipe is available for more traditional, higher temperature heating and low-temp cooling systems, as well as today's more energy efficient low-temp heating and higher cooling temp systems.

Fast Facts

1/2"

24'

Aquatherm Blue is available in sizes from 1/2-in. to 24-in.

200°

100psi

Depending on pipe size and SDR, Aquatherm pipe can handle fluids up to 200°F at pressures up to 100 psi.

Aquatherm Blue approvals include NSF 14, ASTM F2389, CSA B137.11, ICC IMC and IAPMO UMC.
