## Let us do the heavy lifting – and fabrication.

Time is money – and nowhere is that more evident than in today's construction industry. Since mechanical and plumbing profit margins are tighter than ever, you need piping solutions that separate you from your competition. You need partners that can add value and help make your job easier.

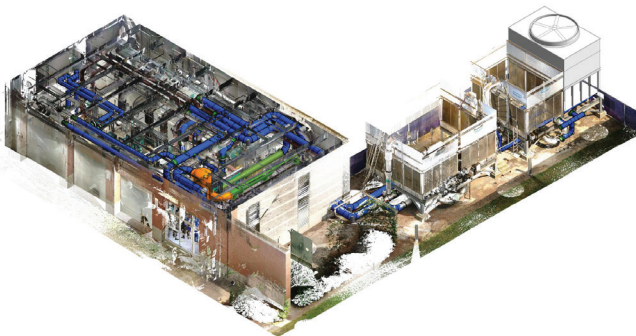

Aquatherm polypropylene pipe systems deliver that game-changing product for commercial, institutional, industrial, government applications, and many more.

As the world leader in polypropylene piping, we offer our expertise and world-class fusion welding equipment to deliver custom fabrication services. Whether it's a detailed spool, large diameter elbows, or complex manifolds, Aquatherm's dedicated and experienced Fabrication Services team is at your service.

### How we partner

Our experienced staff serves as an essential extension of your team, easing your workload and helping you meet deadlines by:

- Assisting in cost comparisons
- Partnering to identify Aquatherm-specific solutions
- Delivering fabrication models and fabrication spool drawings
- Creating custom builds
- Providing Scan-To-Fab services
- And so much more!

Scan-to-Fab

## 1 Estimation & Planning

## 2 Drafting

## 3 Fabrication

## 4 Shipping

## 5 Installation

## Why is Aquatherm ideal for fabrication?

### ...And how can it help you?

While Aquatherm's performance characteristics in mechanical, plumbing and industrial applications make it more similar to metal than plastic, it's considerably lighter than metal and more durable and reliable than other thermoplastics. This results in an easier fabrication process.

A proper heat fusion connection results in a joint as strong as the pipe itself. Additionally, polypropylene is incredibly sturdy, yet slightly flexible.

So after Aquatherm Fabrication Services has meticulously built your spool, it will be carefully shipped to your job site anywhere in the U.S. or Canada, typically resulting in material and/or labor savings.

### Savings opportunities abound

Building owners and contractors throughout North America have reaped financial, labor, logistical, and operational benefits from using our Aquatherm Fabrication Services.
